GS1 Global Standards Management Process

Project assessment tool for potential new projects

This GS1 Global Standards Management Process (GSMP) project assessment tool should be used prior to starting the GSMP Project Proposal Document. The proposal must be approved by the GS1 Board Committee for Standards before initiating any new GSMP effort. This tool facilitates informed discussions on the business challenge and proposes recommendations for the next steps.

1. Submitter name

_____

2. Organisation

Is this request on behalf of an organisation, group or industry?   Yes   No
Please provide details:

_____

Example: A GS1 Member Organisation is making this request on behalf of EU healthcare providers that require specific supply chain master data from EU healthcare manufacturers. Also, a GS1 Member Organisation is committing to work with Global Office to actively support the development.

3. Business challenge

Briefly describe the business challenge

_____

If the challenge is regulatory, is it: an existing regulation   a future regulation?

Provide detail and links to the regulation
(Examples: regional or national regulation, Delegated Acts)

_____

4. Participation commitment

*Note: As per the GS1 GSMP Manual (pg. 17, section 7) a minimum of 12 organisations must be available to vote. A minimum balance of different participant roles must also be achieved before a new Mission Specific Work Group can begin: 2 data sources, 2 data recipients, 2 Member Organistaions, and inclusive of solution providers (if applicable).

GS1 standards development requires a community willing to join a GSMP group to develop and implement the resulting standard. Do you have a commitment from industry and Member Organisations to sign the GS1 IP Policy and participate in the GSMP work group?
   Yes   No

Participant Name	Organisation Name

Additional names/organisations

_____

5. Scope of business impact

a. Which industries or sector(s) would be impacted?

_____

Are the industries or sector(s) currently implementing GS1 standards?   Yes   No

b. What region(s) or country(s) would be impacted?

_____

6. Scope of standards/services impact

a. Which area of GS1 standards could be impacted?
    If known, please list (e.g., AIDC, master data, etc.)

_____

b. Could GS1 services be impacted?   Yes   No
    If known, please list (e.g., GS1 Registries, Verified by GS1, etc.)

_____
