

GSMP Electronic health record patient demographics in GS1 barcodes MSWG

project Lead: Greg Rowe

Report Date: November 2023
Expected project close date Q2 2024

Business purpose

- The objective of the MSWG is to build a set of new Application Identifiers to support the offline capturing / verification of patient demographic information. This will result in a General Specification Change Notice being developed

Key issues and risks

- Catherine Koetz of GS1 Australia, one of our tri-chairs, announced she was leaving GS1. She nominated Nigel Fuller of GS1 Australia. There were no other nominees. Currently Ethan's confirmation is running and will be approved for the 09 November call.

Accomplishments this period

- Team completed the Design Assumptions
- SME presented first draft of the HC Patient Demographic GSCN (General Specification Change Notification)

Upcoming period activities

- Continue to develop draft GSCN

GSMP Electronic health record patient demographics in GS1 barcodes MSWG

Overall Status

#	Standard/guideline Milestones	Due Date	Notes	#	Collateral milestones	Due date	Notes
1	Deliver GSCN for new Application Identifiers	Q2 2024		1	To be determined		
2				2			
3				3
