# 1. Business Domain View

## 1.1. Problem Statement / Business Need

Purchase Conditions express the official commitment between buyer and seller that certain quantities are to be delivered over a given period and at the stated price. In doing so it sets the contractual conditions for the ordering and delivering of the goods and so details specific terms and conditions that apply for a given period.

The Purchase Conditions does not intend to contain the totality of the contractual information, but to provide the relevant data in order to be able to align key conditions in an automated way.

The Purchase Conditions message supports multiple scenarios:

- Fixed quantity and fixed period
- Fixed quantity and variable period
- Variable quantity and fixed period

## 1.2. Objective

This standard defines the transaction model and data model for the following business message:

- Purchase Conditions

## 1.3. Audience

The audience for this document is the global business community and the senders/receivers of conditions.
