Standards Event 2017
20-24 March Jersey City

Session: Global Product Classification (GPC) SMG
Time: Wednesday, 13:45 - 17:30

Mar-22, 2017

Anti-trust caution

- GS1 operates under the GS1 anti-trust caution. Strict compliance with anti-trust laws is and always has been the policy of GS1.

- The best way to avoid problems is to remember that the purpose of the group is to enhance the ability of all industry members to compete more efficiently.

- This means:
  - **There shall be no discussion of prices, allocation of customers, or products, boycotts, refusals to deal, or market share.**
  - If any participant believes the group is drifting toward impermissible discussion, the topic shall be tabled until the opinion of counsel can be obtained.

- The full anti-trust caution is available via the link below, if you would like to read it in its entirety: http://www.gs1.org/gs1-anti-trust-caution.

Statement & reminder for seeking intellectual property information

- Relevant to the features of the specification that are being developed in this work group, if anyone has knowledge or information about intellectual property rights, such as, patents or patent applications; please promptly convey this information to the work group facilitator.

- The intellectual property rights can either be in development or owned by persons, companies or third parties within this work group or outside this work group.

- We do this under the guidance of the GS1 Intellectual Property Policy, so that GS1 can seek to avoid the uncertainty regarding intellectual property claims against the Specification.

GS1 Standards Event App – How to get it

**1** Get the App by searching your App store for "GS1 Global Events"

> (If you already have the Global App due to attendance at the most recent Global Forum, you do not need to do this)

2 Once you have the Global App on your mobile device, the Standards Event module will automatically show up. Please click the orange (+) to activate the event within your application.

3 Login with the email address you used to register for the event:

GS1

WR 17-030 Dairy Products & Fat

Submitted by the German GDSN community to provide a solution to the following:

- Milk Substitutes & Related Products is a growing category and retailers want to distinguish these products in a clear way, which currently is not possible since the existing bricks are combined.

- Many of these products have specific regulations (in Europe and possibly other countries as well) and certain distinctions need to be defined. If the bricks remain together with non-animal products, GDSN validation rules and retail validations cannot be applied. Additionally some attributes are only valid for one category, e.g. origin of cheeses or milk treatments.

A Survey will be sent to the GPC SMG members asking them to choose 1 of 3 possible solutions

New Community Room
